

Patient Information

CPAP machines and elective surgery

If you are staying overnight and use a **CPAP** machine for **Sleep Apnoea** please follow the below instructions:

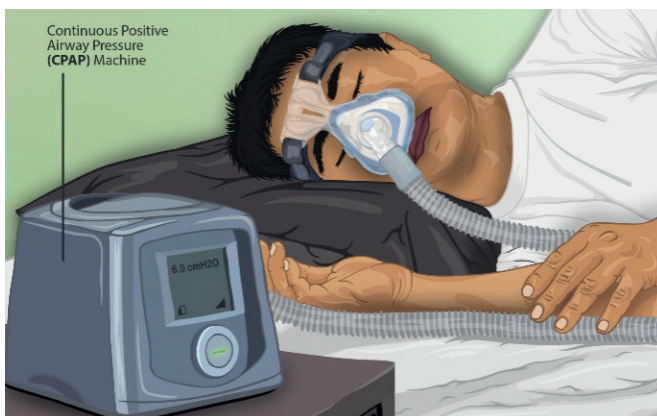

Image author: <http://www.myupchar.com/en>

- Please bring the machine and any “instructions for use” to the hospital on the day of your planned admission.
- Ensure the machine is **cleaned** prior to bringing it in and remember to bring all parts/charging cable and any disposables required. (The hospital will not have any parts/disposables).
- Hand the machine to your admitting nurse so it can be checked by our engineering staff prior to being used in the hospital.
- If you need help to get it set up after your surgery, **please** ask the nursing staff for **help**. (Please note that the nurses can only assist as they may not be familiar with your machine. They will need you or your families support to best assist you).
